Art Unit: 1625

Claims 1, 3-55 are pending in this application.

Claims 49-51 are drawn to non-elected inventions.

Restriction Requirement

The election of group I, with traverse in the Paper filed 1/5/09 is hereby acknowledged. The traversal is on the basis that groups I and II could be examined together. The restriction of group II is now withdrawn. The response by applicant is an incomplete response to the restriction, which requires applicant to elect "only" one ring as representing A. However, in the

elected species, A is and therefore is deemed elected in group I. Applicant contends amino-benzopyran is shared by all the compounds. This is not persuasive because "N" not amine is at position 4 of the pyran ring and common to all the compounds. The substituents on "N" vary from species to species. Applicant further argues that all the remaining species in claims 1, 3-55 are sufficiently related without providing support thereof. This is not persuasive because the species are in fact not related for reasons set forth in the restriction. Having found no prior arts when elected ring A was searched, all the six-atom rings in claim 1 are included in this examination.

The restriction of the five-atom rings as "A" is deemed proper and therefore made FINAL.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1625

Claims 1, 3-48, 52-55 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are confusing and therefore indefinite. It is not possible to ascertain the definitions of the substituents in formulae I and II. For example, R13-R15 are not defined in claim 1. The claims recite several “(“, which are not closed and numerous “arbitrary”. The species in claims 52-53 are not clear and confusing. In patent examination, it is essential for claims to be precise, clear, correct, and unambiguous. *In re Zletz*, 893 F.2d 319, 13 USPQ2d 1320 (Fed. Cir. 1989).

It is suggested that applicant use combinations of coma, semicolon, line spacing and indentation. “Arbitrary” in every occurrence must be deleted.

Objection

Claims 1, 3-48, 52-55 are objected to for containing non-elected subject matter, and must be amended by limiting ring A to six-atom rings in claim 1 to put the application in condition for allowance.
